The Manufacture of Sulphuric Acid in the United States Volume 178-184

By Arthur Edward Wells

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: .dioxide and about 9 per cent oxygen, the rest being nitrogen and water vapor; the gases from a brimstone burner will usually have a sulphur dioxide content of 8.0 to 8,5 per cent. Such a gas mixture will contain sufficient oxygen to oxidize the sulphur dioxide to sulphur trioxide and also provide the necessary excess of 5 per cent oxygen for satisfactorily working the chambers. CHAMBER CONSTRUCTION. As in the last 10 years several construction companies in this country have made a specialty of chamber-plant construction and have developed special types suitable for different conditions and localities, it is not necessary in a paper of this character to discuss the construction of the chambers beyond outlining briefly some of the fundamental principles that underlie all chamber construction. Chambers should always be placed at some elevation above ground level so that the bottoms are accessible...
