The union of these materials is such as to produce 50 a good insulation of the wires, and such as to enable the composition to be readily cut or chipped out in inserting or removing wires or repairing the same. In its natural state the asphaltum is too tough and adhesive to be 55 easily chipped. The sulphur hardens it, so 40 that it becomes brittle to a considerable de grec, and can be readily chipped by a proper tool. The rosi n has a somewhat similar effect, and in addition it binds the asphaltum, so that it will uot break too easily. This mate-60 rial is comparatively cheap, and can be used for filling conduits of considerable size without involving great cost. The drawings show one method...
