

## Mathematical questions and solutions in continuation of the mathematical columns of the Educational times Volume 33

Filesize: 8.36 MB

### ***Reviews***

*Here is the finest ebook i have got read until now. It really is simplistic but excitement within the 50 percent in the book. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

## MATHEMATICAL QUESTIONS AND SOLUTIONS IN CONTINUATION OF THE MATHEMATICAL COLUMNS OF THE EDUCATIONAL TIMES VOLUME 33

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1880 Excerpt: . . . without calculation; for the chance that the mixture contains not less than  $i$  ( $m$   $n$ ) wine must be equal to the chance that it contains not more than  $i$  ( $m$   $n$ ) wine, that is, J. 5167. (By Prof. Seitz, M. A. )--A point is taken at random in the surface of a given circle, and from it a line equal in length to the radius is drawn, so as to lie wholly in the surface of the circle; find the chance that the line intersects a given diameter. Solution by Rev. H. J. Day, M. A. ; E. B. Elliott, M. A. ; and others. Let  $p$  be the distance of the random point  $P$  from the centre of the circle  $C$ ;  $c$  the radius of the circle; and  $\theta$  the inclination of  $CP$  to the given diameter. Then the whole range of the angles at which the radius can be drawn as prescribed through  $p$ , is  $2\cos^{-1}\frac{p}{c}$ , and the number that cut the diameter in that set is, evidently,  $\frac{2c}{p}$ . This expression does not seem to admit of integration in finite terms. 5758. (By Rev. H. Q. Day, M. A. )--If  $A, B$  be two fixed points, and  $P$  a variable point in the line  $AB$ , and if with  $A, P$  as foci an ellipse of eccentricity  $e_1$  be drawn, and with  $B, P$  as foci an ellipse of eccentricity  $e_2$ , intersecting the former in  $Q$ ; prove that the locus of  $Q$  is an ellipse...
